Profile

Results-driven AI/ML Engineer and project technical lead with experience architecting, scaling, and deploying enterprise AI solutions across healthcare, academia, and digital products. Expert in end-to-end machine learning model development, Generative AI applications, MLOps, and multi-cloud architecture (Azure, AWS). Proven track record of translating complex stakeholder requirements into scalable AI solutions, establishing AI ethics and governance frameworks, and driving technical transformation.

Experience

Digital Innovation Engineer | Torbay & South Devon NHS Foundation Trust | September 2023 – Present

- Led AI scaling and digital transformation initiatives across the NHS ecosystem, aligning technical strategy with organizational goals for OneDevon.
- Architected, trained, and deployed enterprise machine learning models and predictive analytics systems targeting complex clinical, operational and business intelligence challenges using PyTorch and Scikit-Learn.
- Served as team technical authority on machine learning, managing MLOps pipelines and cloud infrastructure on Azure, AWS, and Cloudflare to ensure scalable, reliable deployment.
- Formulated institutional AI governance and ethical compliance frameworks for clinical AI deployment, leading executive and senior stakeholder engagements
- Guided and mentored junior and apprentice level staff in multiple facets of end-to-end solutions engineering.

Data Analyst | University of Plymouth | November 2025 – September 2026

- Engineered automated data pipelines and analytics solutions using Python and SQL to evaluate institutional performance and guide executive strategy.
- Designed and maintained Power BI dashboards using DAX for dynamic financial and operational monitoring.
- Automated reporting workflows and data ingestion pipelines, establishing robust MLOps practices for reliable analytics execution.
- Produced executive-level briefings and board-ready presentations translating complex data into strategic insights.

Studio Lead (Due Process) | Giant Enemy Crab | December 2024 – Present

- Directed technical strategy and engineering operations for high-scale commercial software products serving 250,000+ users.
- Contributed hands-on technical development in C# and Unity alongside studio-level coordination.

Full Stack Engineer | Smart Crafts Supplies Ltd | September 2021 – September 2023

- Solely responsible for full-stack development and maintenance of core e-commerce web services and operational tooling.

Education

T Level in Digital Production, Design & Development | September 2022 – July 2024 | South Devon College

Skills & Abilities

- Python, C#, C++, SQL, NoSQL, TypeScript, Rust
- AI/ML Model Development, Generative AI, LLMs
- PyTorch, Scikit, Jupyter, XGBoost
- MLOps, Azure, AWS, Cloudflare, Docker, Kubernetes
- Technical Leadership, Mentoring & Management
- AI Transformation & Stakeholder Engagement
- AI Ethics, Governance & Risk Mitigation

Certifications & Memberships

- BCS Professional Membership (MBCS)
- FEDIP Practitioner

Awards

- SWPCA 2025 Choice and Control Award (Eye Tracking Controlled Wheelchair)
